Nichols Brothers Boat Builders: Pioneering Maritime Autonomy and Innovation

NBBB Awarded Contract to Build No Manning Required Ship (NOMARS)

FREELAND, WA - Nichols Brothers Boat Builders (NBBB), an innovation leader in the boat building industry, is proud to announce the award of a contract to construct the groundbreaking No Manning Required Ship (NOMARS). This program aims to revolutionize naval operations by designing a ship that can operate autonomously for extended periods at sea without an onboard crew.

This project, awarded by Serco North America, represents an exceptional opportunity for NBBB to showcase the prowess of their highly skilled team and their commitment to pushing the boundaries of maritime innovation. With decades of experience and a reputation for delivering high-quality vessels, the company is excited to take on this significant challenge and contribute to shaping the future of autonomous maritime operations.

Gavin Higgins, CEO of Nichols Brothers Boat Builders, expressed his enthusiasm for the project, stating, "We are honored to be chosen by Serco North America, the prime contractor and designer of the vessel, to embark on this innovative journey. The NOMARS program envisions a future where maritime operations can benefit from enhanced efficiency and performance through autonomous technology. This initiative aligns with our dedication to pushing the boundaries of what's possible in boat building. Our talented team of engineers, designers, and technicians is eager to demonstrate our expertise in developing cutting-edge vessels."

Nichols Brothers Boat Builders will leverage its proven track record of delivering innovative solutions to address the technical complexities of the NOMARS project. The company's commitment to excellence ensures that every aspect of the ship's design aligns with the program's objectives, propelling the vessel into the forefront of maritime autonomy.

With this opportunity, NBBB reaffirms its position as a pioneer in the boat building industry, dedicated to shaping the future of maritime technology.
